March 24, 2020

Zephyr ISD Families,

We want to express our gratitude for your patience as we try to navigate these uncharted waters together. As we have said before, please do not hesitate to contact us here at the school if there is anything we can do to help during this time.

It is our goal to continue educating your child(ren) even when they are not allowed to be on our campus. As such, we must continue doing our best to provide instruction and assess student's understanding of the material.

We completed our second week of work distribution yesterday and have heard some of your expressed concerns regarding the amount of work being too much. Therefore, we want to ease your minds and let you know teachers should be contacting you with a revised expectation of the assignments that were sent home on Monday.

Additionally, as we are still in the process of making the transition to an online learning format, we understand not all of you have access to appropriate devices or Internet. If teachers have assigned any work that requires materials or access that you do not currently have or do not understand, do not panic. Please contact the teacher of the class via email, Remind, or a phone call to the school, depending on what the teacher has set up with you.

We hope to begin rolling out the appropriate technology by the end of this week or the beginning of next week. We are currently in the process of getting our current devices ready and awaiting delivery of our other devices. We will communicate information about how the process will work as we get closer to readiness.

Please don't hesitate to contact us if you have any questions or concerns.

Thank You,

Zephyr ISD Administration
